Remote Email and VPN Access Work Instructions for India Staff

Version 3.0

INTERNAL USE ONLY

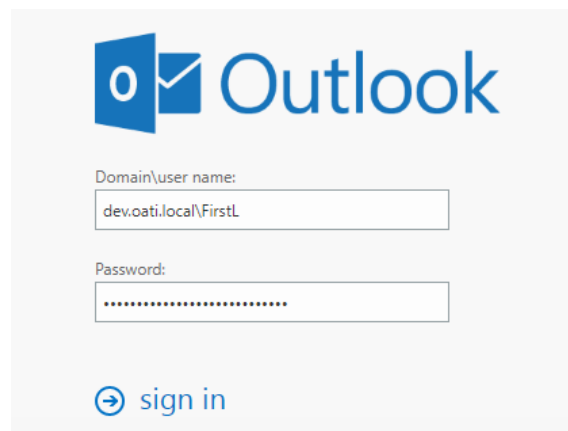

Description: The purpose of these Work Instructions is to guide access to remote email and Virtual Private Network (VPN) service to OATI assets using OATI staff personal equipment. OATI has a VPN service available to employees that require remote access to OATI resources. To request access, the “VPN Access Request Form” needs to be processed via webSupport. Once VPN access permission enabled, the employee will be automatically notified. VPN access is only available from India, USA, Canada and Mexico. If you intended to connect from any other countries, you will need to have prior authorization.

1. OATI Exchange

- A. On your personal computer, navigate to <https://exchange.oati.com>.

Note: If you do not have access to Exchange, a webSupport task will have to be created to request access.

- B. Enter your username including the domain (Example: dev.oati.local\FirstL), as well as your Windows login password.

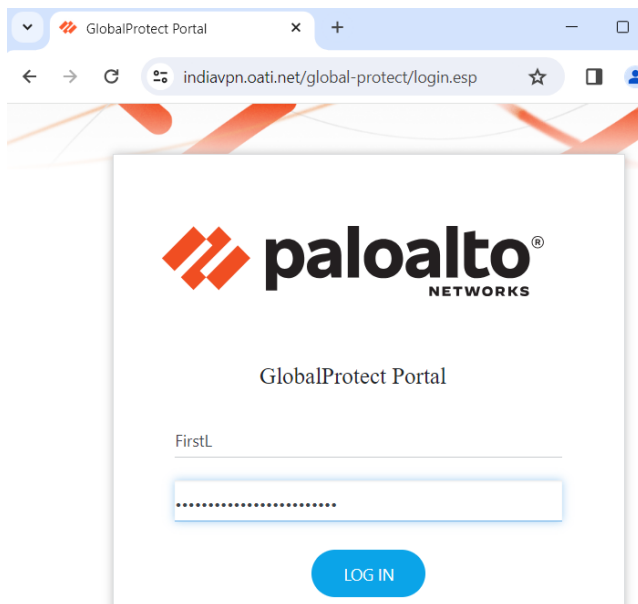

2. Install the Personal Certificate

- A. In order to download and connect to OATI’s VPN, your certificate (**First Last.pfx**) must be installed. An email containing this certificate and a separate email containing the certificate’s password should be in your inbox in the folder labeled “Important”.
- I. If you are not able to find certificate, create webSupport ticket to Help Desk and request the certificate to be re-issued.

- B. Download and save the file locally and run the import wizard. Click Next > Next > Enter the password, then click Next > Next > Finish.

3. Installing GlobalProtect

- A. Navigate to <https://indiavpn.oati.net> and select the personal certificate when prompted.
- B. Enter your Windows credentials and click LOG IN.

- C. Download the appropriate GlobalProtect version for your system and run the installer.

GlobalProtect Portal

[Download Windows 32 bit GlobalProtect agent](#)

[Download Windows 64 bit GlobalProtect agent](#)

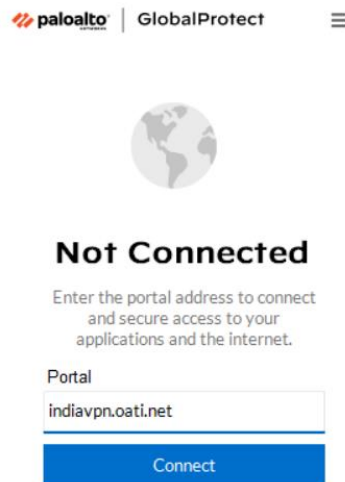

[Download Mac 32/64 bit GlobalProtect agent](#)

4. Connecting to GlobalProtect

- A. After installing GlobalProtect, you may find it in the taskbar system tray in the lower right of your system. If you cannot find it here, you can search for it in the Start menu.

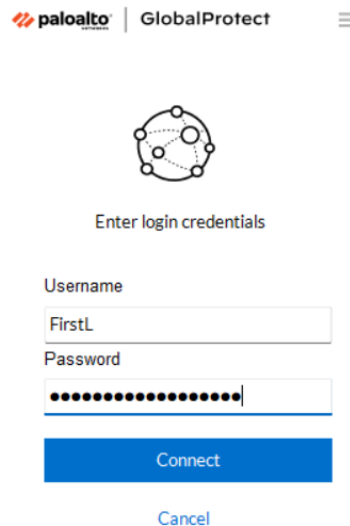

B. Enter **indiavpn.oati.net** for the portal and click **Connect**.

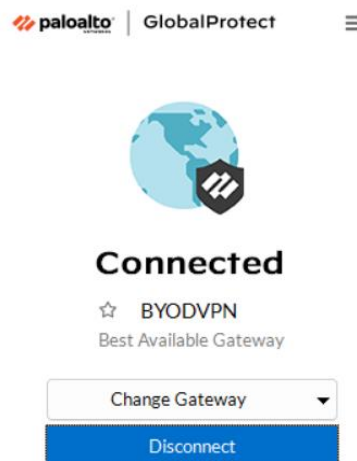

The screenshot shows the Palo Alto GlobalProtect client interface. At the top, the Palo Alto logo and 'GlobalProtect' text are visible. Below is a globe icon. The main heading is 'Not Connected'. A message states: 'Enter the portal address to connect and secure access to your applications and the internet.' There is a text input field labeled 'Portal' containing 'indiavpn.oati.net'. Below the field is a blue 'Connect' button.

C. Enter your username and password, then click **Connect**.

The screenshot shows the Palo Alto GlobalProtect client interface. At the top, the Palo Alto logo and 'GlobalProtect' text are visible. Below is a network icon. The main heading is 'Enter login credentials'. There are two text input fields: 'Username' containing 'FirstL' and 'Password' containing a masked password (dots). Below the fields is a blue 'Connect' button and a blue 'Cancel' link.

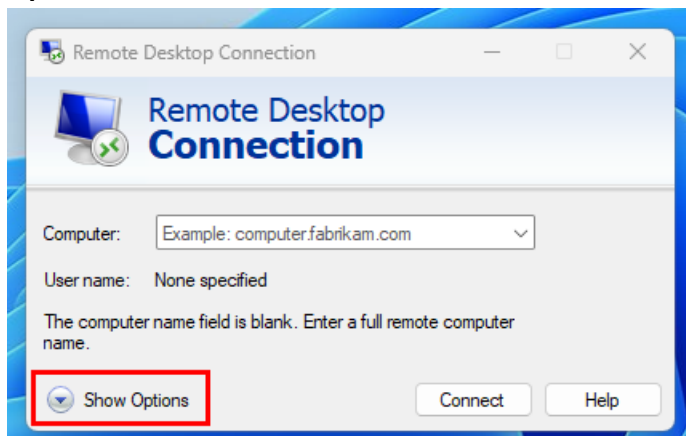

D. Wait until it says **Connected**.

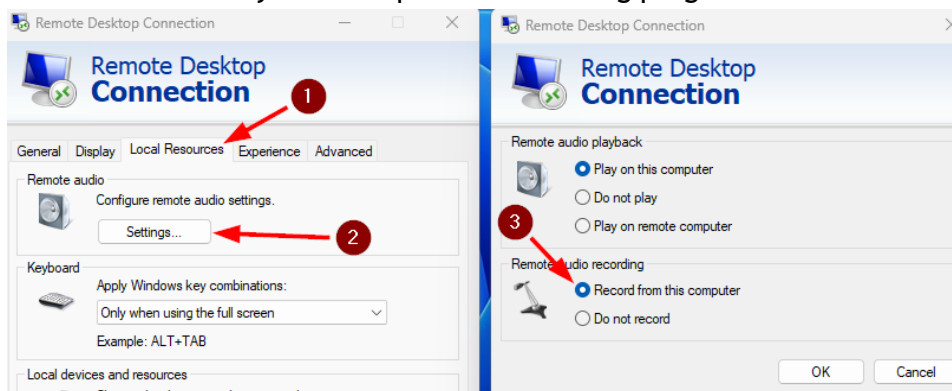

The screenshot shows the Palo Alto GlobalProtect client interface. At the top, the Palo Alto logo and 'GlobalProtect' text are visible. Below is a globe icon with a shield. The main heading is 'Connected'. Below the heading is a star icon, the text 'BYODVPN', and 'Best Available Gateway'. There is a dropdown menu labeled 'Change Gateway' and a blue 'Disconnect' button.

5. Remote Desktop Connection

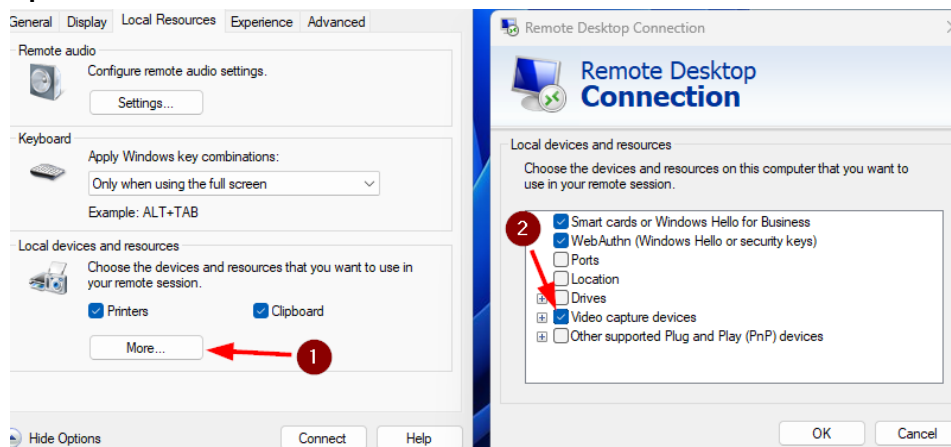

- A. Search for “**Remote Desktop Connection**” in the Start menu and open it.
- B. Click “**Show Options**”.

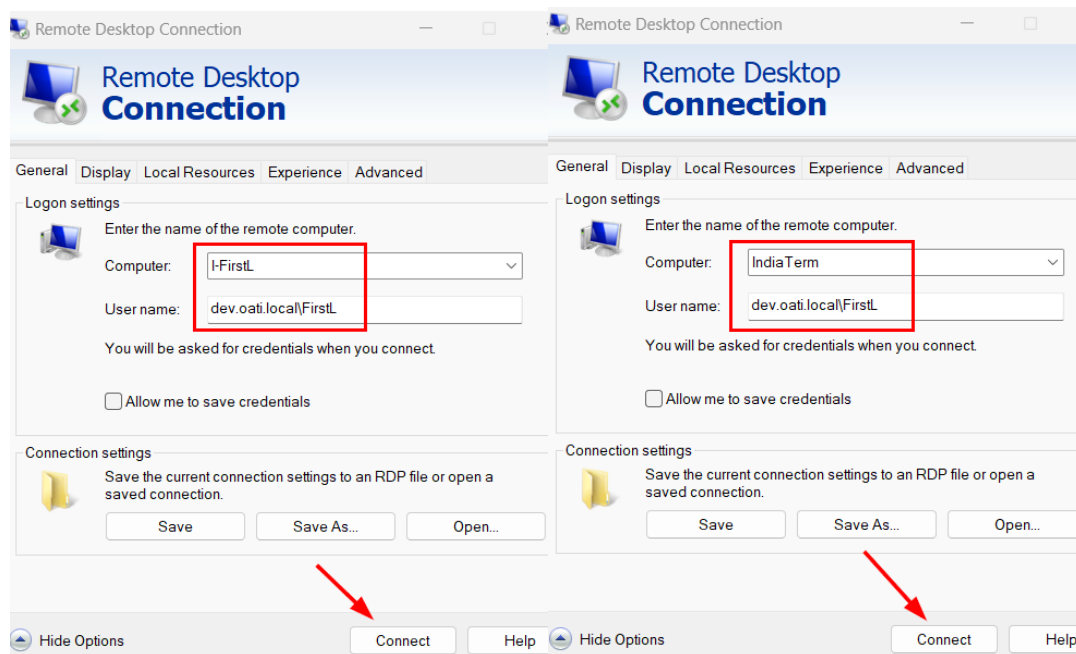

- C. Click on the **Local Resources** tab. Click **Settings**. This will open another window. Select “**Record from this computer**” and click OK. This will allow the remote machine to access your microphone when using programs such as Zoom.

- D. If you plan to use a video camera, click **More...** and check the box for **Video capture devices**. Click OK.

- E. Return to the **General** tab. In the computer name box, either type your machine name in the format of **I-FirstL** or **IndiaTerm** for the machine name, depending on which one you are using. Then, enter your username in the format of **dev.oati.local\FirstL**. Click **Connect**.

- F. Enter your password and click **OK**.
G. The remote computer may prompt to trust the identity, choose **“Yes”** if so.
H. Once connected, use the computer as if you are sitting at your desk.

If you have any issues completing the above steps, create a webSupport task and assign to Desktop Support.
